

**Election of Species**

Applicant elects Species I as drawn to a process that requires implanting of nitrogen ions prior to patterning of a first insulating film and a first polysilicon layer, as including claims 1, 5, 6 and 11, for initial examination in the present application. This election is with traverse.

**Remarks/Arguments**

Claims 1, 2 and 5-14 are pending in the present application.

As noted above, Applicant has elected Species I including claims 1, 5, 6 and 11 for initial examination.

The Examiner has asserted in the Office Action dated October 25, 2005, that claims 5 and 9 are generic. However, it is not understood how claim 5 as dependent upon claim 1 of Species I may be considered generic.

Applicant also respectfully submits that claims 10, 13 and 14 should be considered generic. **Applicant therefore respectfully requests examination of generic claims 9, 10, 13 and 14, along with claims 1, 5, 6 and 11 of elected Species I.**

Favorable consideration and early allowance of the present application are respectfully requested.
